Aura Collection

At Malone Fabrics, we realise the importance of fabrics that contribute to a sustainable and circular economy. Not only do we talk about it, but we also act on it. By using ecologically sourced materials and products with a greener production process, we are taking the eco-friendly road.

Harmolan PP is an upcycled yarn from waste from the oil industry and fully produced in-house, without the use of water and with minimal use of energy.

GRS Polyester (global Recycled Standard) certified polyester, made from post-consumer recycled bottles.

Aura Collection When boucle meets chenille. Aura is a heavy textured yet super soft weave, coming in a wide range of 26 warm colours. This new member of our sustainable family is made with recycled polyester and Harmolan PP. It is incredibly comfortable, durable, easy to clean and sustainable. The soft touch fabrics are strong and durable thanks to the latest technologies.

Composition 58% PAN 22% PL 20% Harmolan PP
Weight 532 gm/m²
Width 140cm
Roll length 40m

Cleaning Instructions

To minimise the effects of creasing, we recommend you turn cushions regularly and use a good quality foam interior.

Vacuum regularly to remove surface dust and fluff etc.

A foam cleaner may be used for stains and applied with a large pored sponge or special applicator following the manufacturers instructions. Do not use a coarse or stiff bristle brush and avoid saturating the fabric with cleaning fluid or water as this could cause discolouration.
