Bisou Collection

At Malone Fabrics, we realise the importance of fabrics that contribute to a sustainable and circular economy. Not only do we talk about it, but we also act on it. By using ecologically sourced materials and products with a greener production process, we are taking the eco-friendly road.

Harmolan PP is an upcycled yarn from waste from the oil industry and fully produced in-house, without the use of water and with minimum use of energy. GRS Polyester - made from recycled bottles. Lenzing EcoVero - is a new standard in co-responsible viscose production, with a much lower environmental impact, leaving air and water cleaner. Linen - a natural fibre which requires no chemicals and a minimal impact on the planet.

Composition 32%PES, 32% CV, 20% Harmolan PP, 16% LI

Weight 449 gm/m²

Width 140cm

Roll length 40m

Cleaning Instructions

Dry Clean Only or spot cleaning

To minimise the effects of creasing, we recommend you turn cushions regularly and use a good quality foam interior.

Vacuum regularly to remove surface dust and fluff etc.

A foam cleaner may be used for stains and applied with a large pored sponge or special applicator following the manufacturers instructions. Do not use a coarse or stiff bristle brush and avoid saturating the fabric with cleaning fluid or water as this could cause discolouration.
